## KM 20/30/60/100-2ME / -3ME <br> KM 20/30/60/100-2ME / -3ME Ex

Gas mixing systems for 2 or 3 defined gases, designed for a variety of industrial applications, particularly for all areas with sharply fluctuating mixed gas extraction quantities.

## Benefits

## Easy operation

valves (-3ME), each with a control knob and \%-scale, provide infinitely variable mixture settings
gas mixture withdrawal possible from zero to the maximum flow capacity

High process reliability

- independent of pressure fluctuations in the gas supply
- intermittent gas mixture withdrawal possible
- lockable transparent door for protection of settings
splash-proof and robust stainless steel housing

Other models, options and accessories available upon request. Please identify the individual gases at the time of enquiring!

Capacity range from 0 to approx. $544 \mathrm{Nl} / \mathrm{min}$. For the exact pressure and flow capacity ratios, please see the technical data overleaf.

## Options

for flammable gases available as Ex-version with separate control cabinet

Darm module NXT+: integrated inlet pressure monitoring with digital display for pressure (with analog pressure transmitters) plus optical alarm, adjustable alarm limits, obligation of acknowledgement, protection of alarms, interfaces for controlling external alarms etc.
( integrated gas analysis for the monitoring/control and documentation of the gas mixture production
gas mixer mounted on gas mixture buffer tank for a more convenient installation

## Note:

System only works with sufficient buffer volume (20 to 100 litres depending on gas mixing capacity).
